

General Specifications

Model VP6H4190
Line Printer Support Package

GS 33J05H30-01EN

[Release 6]

■ GENERAL

This function prints Human Interface Station (HIS) messages, one message per line, on a line printer. This printing function uses ESC/P control codes.

■ FUNCTION SPECIFICATIONS

There are two ways of printing messages from the CENTUM VP Operation and Monitoring functions, as follows:

- Message printing functions (prints a whole page at a time)
- One-line printing functions (prints one message per line)

The one-line printing functions and message printing functions receive the print request and message to be printed from message management functions. For logical printer names MSG1 to MSG5, you can set either one-line printing or (one-page) message printing.

Print timing

Messages are printed as they are generated (for one-line printing)

One-line printing to (ESC/P) dot impact printer

One line (one message) is printed at a time. There is no automatic feed to the next page, so use continuous-feed paper.

Color printing support

Use of a color printer allows the printing of each message in two colors, red and black.

Remote printer support

You can print to a remote printer.

Printer Error Monitor

Shows status of printer connected to HIS, and generates a system alarm if there is an abnormality.

Lines per Page

60 lines.

Languages supported

English (other languages not supported).

Support for printing from other software

In one-line printing mode, printing from other software (such as Microsoft Word or Microsoft Excel) is not supported.

Printing to a Page Printer

Not Supported.

■ OPERATING ENVIRONMENTS

Hardware Requirement

Conforms to operating environment of VP6H1100 Standard Operating and Monitoring Function

Software Requirement

Conforms to operating environment of VP6H1100 Standard Operation and Monitoring Function.

Necessary Software: VP6H1100 Standard Operation and Monitoring Function

Printer

Generic dot impact printer (supporting ESC/P control codes)
